Always wants to extend my existing skills and passionate about learning new technologies like.
Passionate about web development and competitive coding.
Enthusiastic for learning machine learning .

PROJECTS

- **The Classy Events**

   This project is developed in java language using servlet. Front end technologies
   are used like HTML and CSS.

- **EVENT MANAGEMENT**

    This web-site is developed using python language in Django and MySQL. I have
   used the front end technologies like HTML, CSS and Java script.

- **OCCASION**

   This web-site is developed using PHP & MySQL. I have used front end
   technologies like HTML, CSS and java script. User can see all the booked and past
   events. According to that user can book the event of their choice.

- **CALCULATOR**

   This project is developed in Android studio.

- **FACULTY STUDENT DOCUMENT SHARING SYSTEM**

   The project on which I am currently working , it is document sharing system by
   which student can submit his/her response and faculty can view that response
   and give ranking based on submission.
